

**NEED A TECH TEAM THAT REALLY KNOWS THE ENERGY VERTICAL?
LET US HELP.**

WHO IS UMPQUA TECHNOLOGIES "UT"?

We are award-winning software developers, cloud architects, DevOps engineers, QAs, project managers and UX designers building amazing solutions for energy companies and utility companies.

WHAT DO WE DO?

We develop new software, assess technical risks, modernize/upgrade existing platforms, and provide outsourced staff to the industry. Our team is spread across 25 different countries.

WHO HIRES US?

We have built software for over 200 companies from all over the world, ranging from the biggest Fortune 500 brands and major utility companies to the hottest startups.

WHAT MAKES US DIFFERENT?

- We hire less than 3% of all applicants
- We provide 24/7 support
- Unlike most outsourced IT shops, our founders have been in your shoes; they hired many bad outsourcers for their past companies before starting with UT
- We're affordable
- Our track record is unmatched
- We have both mid-level talent and very senior CTO-level talent

EXAMPLES OF WHAT WE'VE CREATED:

- Upgraded billing & payment solutions
- Modernized aging infrastructure
- Mobile apps (residential & commercial)
- Cybersecurity upgrades
- Assessments of current tech weaknesses
- Loyalty and marketing solutions
- Interfaces between disparate platforms
- Better appointment scheduling software
- Analytics tools and dashboards
- Energy usage & emergency alerts
- Improved pricing algorithms
- Upgraded speed across the tech stack
- Employee monitoring platforms
- Improved customer onboarding tools
- Gamification of customer initiatives
- Weather and emergency rerouting tools
- Assembled dedicated tech teams
- Led Azure, AWS & GCP cloud transitions
- New UI/UX designs
- IOT & remote monitoring solutions
- And much more...
