

NEED A TECH TEAM THAT REALLY KNOWS HOME BUILDING? LET US HELP.

WHO IS UMPQUA TECHNOLOGIES "UT"?

We are award-winning software developers, cloud architects, DevOps engineers, QAs, project managers and UX designers building amazing solutions for energy companies and utility companies.

WHAT DO WE DO?

We develop new software, assess technical risks, modernize/upgrade existing platforms, and provide outsourced staff to the industry. Our team is spread across 25 different countries.

WHO HIRES US?

We have built software for over 200 companies from all over the world, ranging from the biggest Fortune 500 brands and major utility companies to the hottest startups.

WHAT MAKES US DIFFERENT?

- We hire less than 3% of all applicants
- We provide 24/7 support
- Unlike most outsourced IT shops, our founders have been in your shoes; they hired many bad outsourcers for their past companies before starting with UT
- We're affordable
- Our track record is unmatched
- We have both mid-level talent and very senior CTO-level talent

EXAMPLES OF WHAT WE'VE CREATED:

- Home layout & furniture visualization apps
- Scheduling tools for onsite vendors
- Custom smart home & IOT solutions
- Cybersecurity upgrades
- Interfaces between multiple platforms
- Credit & mortgage application tools
- Home warranty-response tools
- Analytics software and dashboards
- Marketing tools & integrations
- Payment disbursement solutions
- Employee monitoring
- Improving pricing algorithms
- Mobile apps for customers and staff
- Assessments of current tech weaknesses
- Supply chain/materials management tech
- Dedicated software development teams
- Improving transitions to the cloud
- Modernizing legacy IT infrastructure
- New UI/UX designs
- Enhancing databases
- Cybersecurity upgrades
- And much more...
